SYSTEMS AND SOLUTIONS FOR THE PLASTERING INDUSTRY

PROBEAD PLUS

PROFESSIONAL PVCu BEADING

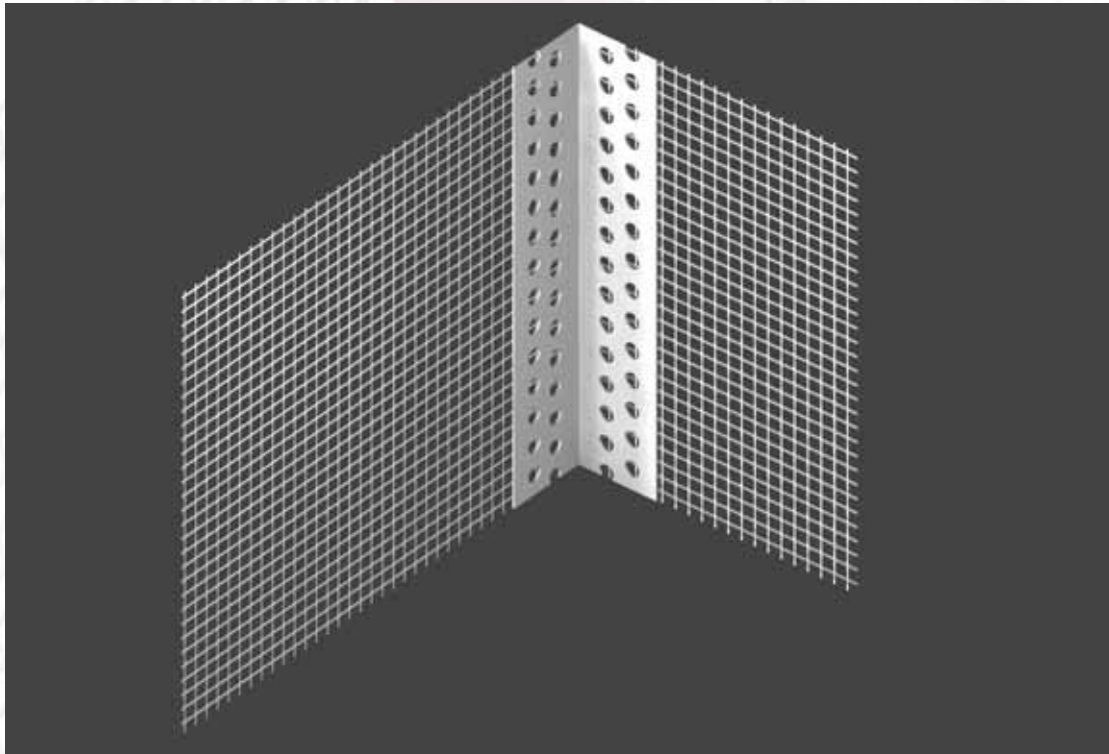

Mesh Reinforced Corner Beads

Specifically designed to reduce risk of cracking in areas such as doorways, windows and corners, the Noseless Meshed Angle Bead is the first product in the new ProBead Plus range of plasterers beads.

Noseless Meshed Angle Beads are already used extensively as part of external wall insulation systems and to create corners for internal plastering. They are suitable for render and thin coat resin finishes including acrylic and silicone products and ideal for use in conjunction with ProMesh for substrates requiring further reinforcement.

ProBead Plus profile with - 15cm x 10cm mesh showing

Advantages of the beads include

- Internal or external use
- Invisible when finished - nose covered by finished product
- Ease of fixing: lightweight and user friendly to handle and cut
